

As parents of an 8 month old, we were able to save considerable time and effort by working with Louie Delaware of Colorado Childproofers. With his wealth of experience, Mr. Delaware has a keen eye for uncovering the potential hazards our little one might encounter. He was able to point out a number of areas of concern in our home that we had not yet considered. Mr. Delaware proposed many creative, user friendly and effective solutions and assisted us in choosing from a wide array of products. As a result of his expertise, we did not waste time or money buying and installing ineffective or inappropriate safety products.

We now have the peace of mind knowing our safety products are correctly installed and up to the task of helping us keep our son's environment safe. Additionally, he was able to install gate hardware on our stairs using clamps that did not require drilling into the banisters. He has stood behind his products and made adjustments as required. Mr. Delaware has been professional, reliable and very adept at providing excellent child safety services.

In summary, we highly recommend Mr. Delaware and Colorado Childproofers.
