

We have twin boys who are great at pooling their efforts to get in trouble. Before calling Colorado Childproofers, we wasted a lot of time and money trying products that didn't work either because the boys could figure them out or because they didn't fit our particular circumstances. (Many products look good on paper but work only if you have standard door knobs, cabinets, entryways, windows, etc.) In his initial visit, Louie Delaware spent three hours evaluating the house, including the basement and garage. The charge for this evaluation was very reasonable. Within a week, Mr. Delaware produced detailed written recommendations. We then chose the products we wanted, and Mr. Delaware worked a full day to get everything installed. Despite encountering some difficulties with the 1928 casement windows in our sons' room, Mr. Delaware stuck precisely to his price list and worked the problem till he solved it. The very best thing he did for us was install Magnetic Tot-Loks on our kitchen cabinets and drawers. Our life changed dramatically for the better the moment those Loks went in!

On the same day Mr. Delaware installed childproofing products, he also did some handyman jobs (including planing a door, hanging a painting in a brick wall, hanging a heavy mirror, venting our dryer, and resetting a wrought iron fence post in concrete). All of his work was excellent and reasonably priced.

Perhaps what we most appreciate about Mr. Delaware is his practical knowledge. He knows childproofing and home safety issues and products inside-and-out. At the same time, he doesn't try to scare you in to buying things you don't need. He often makes practical suggestions that don't require the purchase of a gadget.

In short, we highly recommend Louie Delaware and Colorado Childproofers for childproofing, home safety, and handyman services.
